- TX Unit
- RX Unit
- 2x Power adaptor
- 2x IR Emitters
- 2x IR Receivers
- User Manual

Transmit high-quality, 3D HDMI video over a single economical CAT5E/6 cable!

An upgraded version of our HDC6ECO. Now with local HDMI loop out on transmitter device enables local viewing function. Which means you can view the video source locally as well as on the extended end.

A neat and simple high definition HDMI extender kit. This kit extends your high definition AV sources from Blu-ray DVD Players, PS4 and XBOX etc. up to a maximum 50m via single solid CAT5E/ 6 cables through the wall cavities. The new EDID feature increases its compatibility with players or displays. It supports full 1080P high definition and integrates an infra-red control extender for full controllability from the receiving end. RJ45 connections on the rear of both units make it for easy connection.
